Skills

- **Problem-Solving Skills:** I tackle complex challenges daily in my software engineering studies and enjoy solving problems while climbing.
- **Persistence:** I am persistent in my endeavors, as demonstrated by completing high school through self-study with a high score.
- **Creativity:** I regularly come up with new ideas and seek innovative solutions, whether in coding or climbing.

Summary

I am a second-year software engineering student at the University of Southern Denmark. I completed high school through home study, which instilled in me strong discipline and self-motivation. Creative and proactive, I enjoy taking the initiative and work well with others. In my free time, I love coding, reading books, and climbing, and I also volunteer at a local climbing club. Eager to learn and grow, I am excited about the opportunity to work with a company that supports personal and professional development.

Education

Sep. 2023 -	Software engineering (bachelor), university of southern denmark Sonderborg
Sep. 2019 - Jun. 2023	High school witch IT and english expanded. (High school level), High school in Wrocław

Work experience

Feb. 2024 - Jun. 2024	engineer , Part of university course
-----------------------	---

As part of a university course, my team and I collaborated with Danfoss to develop a user-friendly heating grid optimization app using Avalonia, enhancing system efficiency with real-time data and control.

Jan. 2024 - Feb. 2024	Delivery driver. , Wolt
-----------------------	--------------------------------

Delivered orders quickly and reliably across the city.

Managed multiple orders while ensuring excellent customer service.

Developed time management and problem-solving skills under pressure.
